InfiniT: Breach Hunting Platform

Experience the power of our Breach Hunting services, where we integrate our Cyber Forensics Expertise seamlessly with Malware Science, enabling unparalleled Breach Detection capabilities for swift remediation.

Hunt down breaches faster than ever before with our team of industry experts, minimizing reputational damage and data loss. With a deep understanding of the ever-evolving threat landscape, we offer bespoke, immediate breach investigations that safeguard your digital assets.

Elevate Past Standard TTPs

We actively integrating advanced tactics from leading sources:

Security Research + APT Groups +
Red Team Maneuvers

= Superior Protection and Threat
Mitigation for our clients.

Go Beyond EDRs

We combine human expertise with machine learning and threat intelligence to uncover sophisticated threats that bypass traditional security defense platforms. Our approach doesn't just stop at detecting immediate threats; we also proactively anticipate potential future threats.

Arsenal of Experts

With a proven track record, our expert teams have resolved over 100 complex incidents. Our dual expertise in both attack and defense guarantees thorough investigations, leaving no stone unturned and no trail undiscovered.

Benefit from rapid identification of active threats and our unique ability to forensically analyze breach vectors, thus preventing future incidents.

Powered by Targeted CTI

We've developed specially cultivated Cyber Threat Intelligence, crucial for understanding attacker TTPs across various sectors and geographic regions.

This enables effective breach investigations tailored to specific sectors, uncovering attack vectors meticulously crafted to bypass standard cybersecurity protocols.
